

```

1  /*
2  Write a query to find all authors who have no middle name (assuming
   the Authors table has a middle_name column). Use the IS NULL
   operator to filter for NULL values.
3  Write a query that extracts the first three characters of the title
   from the Titles table (assuming there's a title column).
4  Write a query that removes leading spaces from the publisher_name in
   the Publishers table.
5  Write a query that removes trailing spaces from the author_name in
   the Authors table.
6  Write a query to find all book titles that start with the letter "T"
   (assuming there's a title column in the Titles table). Use the LIKE
   operator and a wildcard to match the pattern.
7  Submission Requirements:
8  Execute each query in the SQL database.
9  Provide screenshots of the output from each query.
10 Submit both the SQL queries and output screenshots in a single Word
   or PDF file.
11 */
12
